13.00 Market risk

Market risk is the risk that changes in market prices such as foreign exchange rate and interest rates will affect the Company's income or the value of its holding of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

14.00 Currency risk

The Company is exposed to currency risk on purchases of raw materials and export sales receivable that are denominated in a currency other than the functional currency primarily in U. S. Dollar. The effects of foreign purchase are significant to the Company. The Company has not entered into any type of derivatives instrument in order to hedge foreign currency risk as at 30 September 2018. The loss or gain arises from foreign currency transactions is adjusted as per IAS 21.

15.00 Interest rate risk

Interest rate risk is the risk that arises due to changes in interest rates on borrowings. Local currency loans are however not significantly affected by fluctuations in interest rates as the rate is below from market rate. The company has not entered into any type of derivative instrument in order to hedge interest rate risk as at the reporting date.
